## WRENSILVA VINYL GROOVE

Lovers of vinyl, superior audio and modern furniture, rejoice. Luxury hi-fi record console brand Wrensilva has landed in the West Hollywood Design District, right next to the Pacific Design Center. "Whether you listen to vinyl or streaming music, a beautiful record console is like a music campfire to gather around and enjoy together," says Wrensilva CEO Greg Perlot. "Our goal is to bring that timeless hi-fi spirit into the present and future, at a performance and quality level that belongs in the most discerning spaces." Wrensilva's L.A. space—which will also be home to the Wrensilva Design Trade Program, with new product options available exclusively to design professionals—was acoustically and aesthetically reimaged by local firm [Studio Collective](#). "Like a record collection, the space is tactile, designed to be touched," says Studio Collective principal designer Christian Schulz.
